

YOUR CLIMATE DISCLOSURE SOLUTION COMPLIANCE - MADE SIMPLE.

A STEP-BY-STEP DIY SYSTEM

Assemble Your Team

Work through how you will integrate climate risk analysis, preparedness, and decision-making across all levels of your Company

01

Gauge The Impact

Examine which parts of your operations will be affected. Build the framework and gather the foundational data for your assessment

02

Assess The Risk

Break down the issues with targeted data, understand the likely impacts, and map the outcomes into a comprehensive matrix

03

Set Your Baseline

Chart your Scope 1 and 2 Emissions and develop other first year metrics to understand where your Company is starting from

04

Plan The Future

With everyone aligned on what's ahead and how each scenario could affect your operations, you're ready to update your strategy accordingly

05

Create Your Climate Risk Disclosure

After working through each module, you'll have the confidence and capability to create a Climate-related Financial Disclosure Statement that meets Australia's mandatory reporting standards

06

THE DETAILS

Purchase a customisable Mandatory Climate Reporting System

A complete system compliant with the AASB Standard 2 on Mandatory Climate-related Financial Disclosures which includes:

- A **printed guide** containing an introduction plus 5 modules, each mapped to the AASB Standard 2 and related guidance. They break down the hundreds of pages of requirements into clear step-by-step steps for your Company.
- A **USB** containing a PDF of the guide plus editable templates and tools to produce the mandatory climate disclosure, and demonstrate audit readiness. This includes:
 - The International and National Law, Guidance & the Standards that apply;
 - **Module 1 - Assemble Your Team**
 - Guide
 - Governance Policy Template updates:
 - Board Charters
 - FARM Committee Mandates
 - Terms of Reference
 - Role description changes
 - Executive Remuneration Template
 - Director's Declaration
 - Action log's (Excel) mapped to AASB S2 to record and assign actions with an auditable trail
 - **Module 2 - Gauge Your Impact**
 - Guide
 - Action log (Excel) mapped to AASB S2 to capture time horizons, scenarios, risk matrix, preliminary climate data and detailed climate projections. This provides an auditable resource that maps with AASB S2.
 - **Module 3 - Assess The Risk**
 - Guide
 - Climate scenario workshop guide
 - Action log (Excel) mapped to AASB S2 for climate scenario narratives and assumptions, critical screening drivers and assessment framework
 - **Module 4 - Set Your Baseline**
 - Guide
 - Action log (Excel) mapped to AASB S2 for capturing GHG methodology, preliminary Scope 3 screening, capital deployment, CRRO exposure, internal carbon pricing, remuneration and benchmarks and roadmaps
 - Scope 1 & 2 Emissions Calculator

Module 5 - Plan Your Future

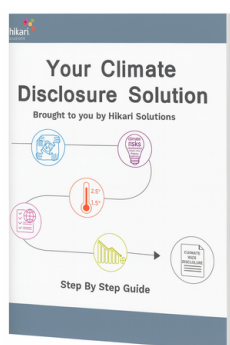

- Guide
- Workshop Guide
- Action Log (Excel) mapped to AASB S2 that includes templates for transition planning, target setting and creating a forwards strategy

- **Climate Disclosure Template**
We have distilled all of this into a completely editable template that is mapped exactly to the AASB S2, indicating which information to include, from where, and allowing you to quickly format and add the Climate Disclosure to your financial reports.

AND - to support you further, you'll get access to walk through videos on the trickier parts of climate disclosure, including using the Scope 1 and 2 emissions calculator and collecting climate data.

Get Bespoke Help

You can implement Your Climate Disclosure Solution end-to-end on your own. If you'd like to move faster or reduce internal effort, we can step in 1:1 where it helps most:

- Scope 1 and 2 emissions data guidance
- Scenario analysis, climate risk assessment, and prioritisation
- Operational impact analysis
- Risk framework development and ERM integration
- Target setting, benchmarking, KPIs, and executive incentives
- Climate governance frameworks and board/management training
- Regulatory compliance and governance reporting
- Third-party verification and assurance
- Climate strategy development
- Financial and investment strategy alignment and business planning

We can jump in and help you 1:1 if you find you need it, as you work through the Climate Disclosure Solution.

\$390 - \$460 per hour*

Climate Disclosure Update Service

As with all our Solutions, updates are inevitable as the legislation evolves, climate science advances, and emissions factors change. Stay current without costly consultants by subscribing to our update service. We'll send changes and new versions directly to you. We know that there will be changes as the legislation develops, climate science is refined and Emissions Factors in the carbon calculator change.

You will need to specifically subscribe to this service, even if you have other product update services.

- Annually we update your Scope 1 & 2 Emissions Calculator with new emissions factors, allowing year-on-year comparison and AASB S2 compliance.
- Any time that there are changes to the legislation or guidance, we will advise you.
- We release new PDF guides if anything significant changes to inform your annual reporting.
- As auditing produces learnings, we will advise you.
- We invite you to discounted information and training sessions where we find our clients are requiring support so that you can learn from one another.

You may cancel any time.*

First Year Updates Included. Thereafter \$2,080 Annually*

Hikari Solutions Pty Ltd strives to ensure that all guidance, templates, and materials contained in Your Climate Disclosure Solution are kept up to date with current regulatory requirements and industry/auditor expectations. However, climate-related disclosure obligations, accounting/sustainability standards, audit frameworks and associated legislation are subject to frequent change.

While we make every reasonable effort to monitor government updates and incorporate relevant amendments, Hikari Solutions cannot guarantee that all changes will be reflected in these materials at the time they are used. Our documents rely on external government notifications, regulator publications, and clients ensuring that they download, review, and apply the most recent versions.

Accordingly, Hikari Solutions accepts no liability for any loss (including consequential loss), penalty (whether civil, criminal or otherwise), or audit outcome resulting from the use of materials that may not reflect the latest legislative, regulatory, or reporting changes. Users are responsible for verifying current requirements and seeking professional advice where necessary before finalising any disclosure or submission.

Hikari Solutions may, at any time, adjust the price of the Climate Disclosure Update Service to apply at the anniversary of purchase. You may opt out by simply not paying the invoice and thereafter must keep duly abreast of any changes as you will have unsubscribed from the service.

*Fees payable in relation to consultancy are set individually and is dependant on the size and complexity of the business and the level of the Hikari staff member engaged to assist you. Fees and charges are subject to change with prior notice. All fees expressed are exclusive of GST.
